**Workshop Title:  
Addressing Stigma  
Through the Health  
Stigma and  
Discrimination  
Framework:  
Experiences of  
Ashtabula, Fairfield,  
Sandusky, and  
Seneca Counties.**

This workshop will cover how funding through HRSA's Rural Communities Opioid Response Program allowed a consortium of four Ohio rural and Appalachian communities to use the Health Stigma and Discrimination Framework (HSDF; Stangl, et al., 2019) to understand, measure, and address stigma associated with opioid use and opioid use disorder treatment. The workshop will focus on how the consortium was able to use the HSDF to develop an innovative community wide survey to measure drivers, facilitators, and outcomes of stigma associated with opioid use. The survey was then fielded by Gallup in each of the four communities in the consortium. Results from the survey will be presented as well as how those results are being used in each community to address and reduce stigma associated with opioid use and treatment. The workshop will share implementation approaches as well as intersections at the community level with ongoing harm reduction.

# Presentation

**Limited to 4 presenters**

**1 hour**

## **Learning objectives:**

- Understand relationships between stigma and opioid use disorder and engagement in treatment and recovery services.
- Learn about the Health Stigma and Discrimination Framework
- Learn about levels of stigma related to OUD in four Ohio communities.
- Learn how community level planning and implementation work related to stigma reduction intersects with harm reduction approaches to opioid use disorder
